Generating PDFs with ReactJS and NodeJS

A Guide to Creating PDFs and Preparing for JS Interviews

Introduction to PDF Generation

- Overview of PDF generation libraries
- Choosing the right library for ReactJS and NodeJS
- Basic PDF generation concepts

ReactJS PDF Generation

- Using jsPDF library in ReactJS
- Generating PDFs from ReactJS components
- Customizing PDF layout and design

NodeJS PDF Generation

- Using pdfkit library in NodeJS
- Creating PDFs from NodeJS API responses
- Handling PDF generation errors

JS Interview Questions

- Common JS interview questions
- Behavioral questions for JS developers
- Technical questions for JS interviews

ReactJS Interview Questions

- ReactJS component lifecycle questions
- State management and props questions
- ReactJS hooks and context API questions

NodeJS Interview Questions

- NodeJS framework and library questions
- NodeJS performance optimization questions
- NodeJS security and authentication questions

Best Practices for PDF Generation

- Optimizing PDF file size and performance
- Ensuring PDF accessibility and compatibility
- Using PDF generation tools and services

Conclusion and Next Steps

- Recap of PDF generation concepts
- Resources for further learning and practice
- Tips for acing JS and ReactJS interviews
